| Patent No. 569370:
| APPLICANT: Moso Jr., Malcolm
| APPLICANT: Wang, Shouwan
| APPLICANT: Wang, Shouwan
| TITLE OF INVENTION: PRODUCTION AND USE OF
| TITLE OF INVENTION: ANTI-DORSALIZING MORPHOGENETIC PROTEIN
| NUMBER OF SEQUENCES: 56
| CORRESPONDENCE ADDRESS: ADDRESSEE: Knobbe, Martens, Olson and Bear
| STREET: 620 Newport Center Drive 16th Floor

Patent No. 6077672
GREREAL INFORMATION:
APPLICANT: Brett P. Monia and Lex M. Cowsert
TITLE OF INVENTION: ANTISENSE MODULATION OF TRADD EXPRESSION
FILE REFERENCE: RTS-0005
CURRENT APPLICATION NUMBER: US/09/143,212B
CURRENT PILING DATE: 1998-08-28
NUMBER OF SEQ ID NOS: 87
LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1.6%; Score 13.2; DB 1; Length 18; 83.3%; Pred. TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
CURRENT PLING DATE: 1999-08-10
PRIOR APPLICATION NUMBER: US 60/005,974
PRIOR PLING DATE: 1996-01-08
NUMBER OF SEQ ID NOS: 14225
SEQ ID NO 2170
LENGTH: 18
APPLICANT: Cohen, Daniel
APPLICANT: Cohen, Daniel
APPLICANT: Chumakov, Ilya
APPLICANT: Chumakov, Ilya
APPLICANT: Chumakov, Ilya
TITLE OF INVENTION: Biallelic markers for use in constructing a high density...
FILE REPERENCE: GENEET, 1999-10-20
CURRENT APPLICATION NUMBER: US 09/298,850

Patent No..5378602

GENERAL INFORMATION:
APPLICANT: Mihael H. Polymeropoulos

TITLE OF INVENTION: TWENTY SEPEN HICHLY INFORMATIVE

TITLE OF INVENTION: MICROSATELLIER REPEAT

TITLE OF INVENTION: POLYMORPHIC DNA MARKERS

NUMBER OF SEQUENCES: 63

CORRESPONDENCE: 6.000, Price, Leblanc & Becker

ADDRESSEE: Lowe, Price, Leblanc & Becker

STREET: Suite 300, 99 Canal Center Plaza
                                                                          US-07-922-723A-27/c

US-07-922-723A-27/c

Sequence 27, Application US/07922723A

Patent No. 536004

APPLICANT: Drs. Mihael H. Polymeropoulos

APPLICANT: and Carl R. Merril

TITLE OF INVENTION: FEVE HIGHLY INFORMATIVE

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               3; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 13, Application US/08835099A

Patent No. 5874277

GENERAL INFORMATION:
APPLICANT: SHINTANI, Yasushi
APPLICANT: NISHI, Kaznori

TITLE OF INVENTION: NOVEL PROTEINS, THEIR PRODUCTION
TITLE OF INVENTION: AND USE

NUMBER OF SEQUENCES: 18

CORRESPONDENCE ADDRESS:
ADDRESSEE: DIKE, BRONSTEIN, ROBERTS & CUSMAN, LLP
STREET: 130 Water Street

Sequence 123, Application US/09166186A

Patent No. 6080580

GENERAL INFORMATION:
APPLICANT: Baker, Bareda
APPLICANT: Bather, Madeline M.
APPLICANT: Bather, Madeline M.
APPLICANT: Bather, Walliam R.
TITLE OF INVENTION: ANTIENSE OLIGONUCLEOTIDE MODULATION OF INF-a EXPRESSION CURRENT APPLICATE: 15PH-0322

CURRENT APPLICATION UNMBER: US/09/166,186A

CURRENT FILING DATE: 1998-10-05

NUMBER OF SEQ ID NOS: 250
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Length 20;

GENERAL INFORMATION:

TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments

TITLE OF INVENTION: Thereof and uses thereof, in particular for the diagnosis, prever

TITLE OF INVENTION: and treatment of infection

FILE REFERENCE: 9710-003-999

CURRENT APPLICATION NUMBER: US/09/198,452A
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             US-09-303-040-72/c
US-09-303-040-72/c

US-09-303-040-72/c

Sequence 72, Application US/09303040

Patent No. 6555671

GENERAL INFORMATION:

APPLICANT: Winslow, Barbara J.

APPLICANT: Wordhran, Mark D.

TITLE OF INVENTION: Recombinant Virus Expressing Foreign DNA Encoding

TITLE OF INVENTION: Feline CD80, Feline CD86, Feline CD28,

TITLE OF INVENTION: Feline Interferon-gama And Uses Thereof

FILE REFERENCE: 5495-B

CURRENT FILING DATE: 1999-04-30

EARLIER FILING DATE: 1998-05-01

SOFFWARE: PatentIN Ver. 2.0

SEQ ID NO 72

LENTH: 20

LE
TITLE OF INVENTION: Biallelic markers for use in constructing a high density...
FILE REPERENCE: GENSET. 020CP1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 72, Application US/09780045
Sequence 72, Application US/09780045
Patent No. 6602713
GENERAL INFORMATION:
APPLICANT: Brett P. Monia
APPLICANT: Jacqueline Wyatt
TITLE OF INVENTION: ANTISENSE MODULATION OF PROTEIN PHOSPHATASE 2 CATALYTIC SUBUNIT 1
TITLE OF INVENTION: EXPRESSION
FILE REFERENCE: RTS-0130
CURRENT PILING DATE: 2001-02-09
NUMBER OF SEQ ID NOS: 135
LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ## SERVENCH INFORMATION

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Gaps
                                                                                                                                                                                                                            Sequence 24, Application US/09218979
Patent No. 6312960
Patent No. 6312960
GENERAL INFORMATION:
APPLICANT: William J. Balch
APPLICANT: Michael E. Hogan
ITLE OF INVENTION: Multiplexed molecular analysis apparatus
FILE REFERENCE: 07762-002003
CURRENT APPLICATION NUMBER: US/09/218,979
CURRENT FILING DATE: 1998-12-22
PRIOR PELICATION NUMBER: 09/002,170
PRIOR FILING DATE: 1997-12-31
NUMBER OF SEQ ID NOS: 32
SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ;

Sequence 2433, Application US/08435628

Patent No. 5817796

GENERAL INFORMATION:
APPLICANT: Strinchcomb, Dan T.
APPLICANT: Draper, Kenneth
APPLICANT: Draper, Kenneth
APPLICANT: Drayer, METHODS AND COMPOSITIONS FOR
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: ACANCER USING RIBOZYMES
CORRESPONDENCE ADDRESS:
